

AI/ML Model Risk Management

Challenges

Problem

Solution

Black box effect inhibits model explainability

A framework that provides model interpretability

Transparency

Many model dev teams, tools and implementations

Consistent model representation and operations process

Repeatability

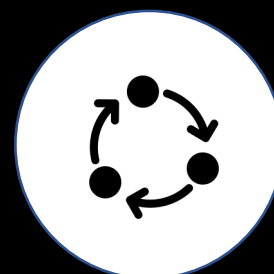

Model drift, data drift, bias, and business change

Continuous monitoring, alerts and tracking

Compliance

Increased model use, re-validation and refresh

Automate testing, benchmarking and reporting

Scale

ModelOp

Monitor, govern and scale AI
decision-making
